LANGUAGES

C, Java, Python, Ruby, ARM, SQL, HTML/CSS, JavaScript, Typescript, GraphQL, React, C++

EDUCATION

Western University, Bachelor of Computer Science

May 2025

- 90% (A+) Cumulative Major GPA
- Relevant coursework: Operating Systems (99%), Networking (94%), Databases (91%)
- Returned in 2024 to finish a dual degree in Computer Science.

Ivey Business School (Western University), Bachelor of Business Administration

Sept 2017 – May 2021

EXPERIENCE

Sapient AI (sapient.io)

May 2025 – Present

Software Engineer (Full Stack)

Toronto, ON

- Led full-stack engineering projects focused on providing better data collection and annotation services for companies looking to train large ML models (ByteDance, Alibaba, Zoox, etc.)
- Built our first AI-assisted review tool. Instead of forcing human agents to manually compare audio files with prompt text, the new AI process transcribes the audio, and provides useful statistics like "text-to-audio-match-rate". This enabled us to expedite the review process, and reduced average review time from 2 minutes to 10 seconds for 10K+ reviews per month.
- Developed a full stack application to enable clients to publish their own custom data labelling projects onto our platform of 1M+ data labellers around the world. Collaborated with sales, product, and design teams to ensure we covered all relevant use-cases/workflows from past clients. Once launched, this platform replaced our month-long manual setup and allowed us to onboard new clients in < 1 day.
- Designed and shipped a new web dashboard (React, GraphQL) to provide enhanced statistics and allow our ops team to efficiently manage/evaluate labelling projects for clients.

techjobs.xyz

May 2024 – August 2024

Software Developer Intern

Waterloo, ON

- Built web scraping pipelines for a fully automated LLM-based job board, providing tens of thousands of new tech jobs for customers.

Milestone Integrated Marketing

2023 – 2024

Media Analyst

Cambridge, ON

- Collaborated on planning and activation for \$3M+ of digital media campaign – within 3 months of joining, was promoted to manage in-store retail and billboard campaigns.

PROJECTS

Multi-Client Chatroom Server ([Link](#))

2024

- Designed and implemented a scalable TCP/UDP chatroom server using socket programming, enabling real-time, multi-client communication with message broadcasting capabilities.

INTERESTS

Tennis (regional champion), running, snowboarding, hot yoga, collecting jazz records
