## EDUCATION

---

### Western University and Ivey Business School

Sept 2017 – May 2021

*Bachelor of Computer Science and Honors Business Administration*

- 90% (A+) Cumulative Major GPA in Computer Science
- Relevant coursework: Operating Systems (99%), Computer Networking (94%), Databases (91%)
- Returned full-time in 2024 and completed the Computer Science degree in May 2025.

## EXPERIENCE

---

### Sapient AI (sapient.io)

May 2025 – Present

*Software Engineer*

*Toronto, ON*

- Sapient is a data labelling platform used by Bytedance, Alibaba and Zoox. I work across the stack in React, Go and Typescript.
- Added an AI quality assurance layer to our labelling pipeline: human-labelled data is checked by a model first, and only uncertain cases are handed to human QA agents. This cut QA costs by 2-4x.
- Built a self-serve project creation wizard for enterprise clients: React frontend, data upload pipeline, auth with org-level roles, and GraphQL API in TypeScript. Replaced manual setup by our sales team; clients now launch a project in minutes.
- Created an AI agent that takes a client's raw verification dataset, maps it onto our internal format, flags inconsistencies in data structure and project guidelines, and guides the client through improving both to high quality before generating the labelling interface and scoring criteria.
- Wrote and published public docs for our underlying ETL system, so technical teams can integrate with it directly instead of going through the agent.
- Fixed payment reliability for our data labellers: edge cases in our multi-round review pipeline could leave a contribution unpaid or unreviewed, so I wrote reconciliation logic ensuring every contribution ends in payment or feedback.
- Ran user interviews, shaped our product roadmap, and led iteration and development with our dev team.

### techjobs.xyz

May 2024 – August 2024

*Software Developer Intern*

*Waterloo, ON*

- Built the scraping pipelines behind a fully automated, self-updating job board, and shipped full stack features (PostgreSQL, Node.js, React).

### Self-Employed

2021 – Present

*Marketing and Engineering*

*Toronto, ON*

- Ran my own marketing and engineering projects, doing both the building and the audience growth. Grew social accounts past 300,000 followers and made six figures in revenue.

### Milestone Integrated

2023 – 2024

*Data Analyst*

*Waterloo, ON*

- Tracked performance across \$3M+ of media campaigns and built the reporting used to compare channels. Promoted within 3 months to run retail and billboard campaigns.

### Titanium Agency (Subsidiary of Media.net)

2018 – 2019

*Marketing Analyst*

*Waterloo, ON*

- Ran digital ad campaigns on multi-million-dollar budgets, covering keyword research, landing pages, ad copy and design.

## ADDITIONAL INFORMATION

---

**Languages:** C, C++, Java, Python, Ruby, ARM, SQL, HTML/CSS, JavaScript, GraphQL, React

**Interests:** Tennis (regional champion), running, snowboarding, hot yoga, collecting jazz records
